

EVENT SERVICES EXPERIENCED LIST

*The City does not endorse any of the below vendors. This is **NOT** a preferred list, but rather a list of vendors that have been hired by renters more than three times in the last year to work in our facilities. Please feel free to hire from this list or outside of this list. Should you choose to hire outside of this list and the vendor has not worked at our facility, a scheduled tour is recommended to ensure a successful event.*

Approved Heater Rentals

For use in the Pickering Barn Hay Barn & Tibbetts Creek Manor Tent (rented through TUCO, see bottom of Page 3)

- **Months of Use by the majority of clients:** November through April (weather dependent)
- **Cost for Barn: \$550** (dependent on diesel costs) If all diesel is not used they may pro-rate you after the unit returns.
- **Cost for Manor: \$250** Includes delivery & pick up.

HEATING SYSTEM LOGISTICS:

The Hay Barn at the Pickering Barn and outdoor tent at the Tibbetts Creek Manor **do not** have a heating system. Whatever temperature it is outside is what it will be inside these areas – minus the elements of rain, wind and snow! During the colder months of typically November through April, most all of our users do rent a heating system for the Hay Barn. If using the tent at the Manor, you'll want the heating system as well. If you wouldn't be ok with your guests sitting outside for your event (without rain, wind, snow, etc – the things that aren't inside the building or within a walled tent) then you'll probably want to rent the heater!

On average, a unit has the success rate of increasing its starting temperature by 15 degrees, plus the additional heat brought in from your guests. It is worth renting for most events during these months. We recommend that the heating unit be running for at least 2 to 3 hours prior to your use of that space (Hay Barn at the Pickering Barn & outdoor tent at the Tibbetts Creek Manor) in order to reach an improved temperature.

What's Approved? How can we heat these spaces?

The Fire Marshall has approved an industrial indirect fired diesel heater. We are not approved to allow standard umbrella patio type heaters or space heaters inside the facilities. It is your responsibility to arrange for the rental, transportation and payment of the unit. Please direct your system questions to the customer service agents. These ARE NOT your standard umbrella patio type heaters or space heaters. They are industrial indirect fired diesel heaters. They will burn approximately 2 gallons of diesel per hour on a moderate setting and will increase the space 10 – 15 degrees every hour, with a 2 hour max. Please direct your system questions to the customer service agents at the company and book the heaters & arrange delivery / pick-up through them as well. **This is the only heating unit that is both approved & compatible with our ducting system.**

Pickering Barn Set-Up: The unit will actually sit outside the North side of the Hay Barn (on the gravel) and the unit's ducting tubes will

run through our custom-built wall vent. There is no diesel smell and very limited noise from inside the facility. Once your guests begin arriving you can choose to turn it off completely and can always re-start it again once the music comes back on. Our rental rates during these months are decreased to help off-set the cost of this heater. The Dairy Barn, Creamery, Lobby, Restrooms and Dressing Rooms are heated.

Tibbetts Creek Manor Set-Up: The unit will actually sit just outside the tent and the unit's ducting tube will run under the tent wall. The paved path photographed below (located on the East side of the house) is the easiest access point to load and unload the unit. Because it's just sitting outside a thin wall, the unit will be noisy from within the tent but much less noisy from inside the house. Once your guests begin arriving you can choose to turn it off completely so it does not have to be heard and can always re-start it again once the music comes back on. Our rental rates during these months are decreased to help off-set the cost of this heater. The interior of the home does provide heating.

HOW TO ORDER THE UNIT:

It is your responsibility as a renter to call TUCO directly to order this unit. You do not order this unit through the Pickering Barn or Tibbetts Creek Manor. You are also responsible for the installation, operation & tear-down of the unit. Since it is a 3rd party rental item the City cannot take the liability of handling the unit. We are however typically available to provide verbal assistance. It is best to designate a brother, uncle or groomsmen to be in charge of the set-up, operation and tear-down of this unit. Some groups meet with TUCO in advance and some just wing it. It honestly only takes 10 minutes to get up & running and isn't overly complicated.

Setting up delivery & pick-up: TUCO only works on the weekdays. Typically they'll deliver all the units for the weekend events on Friday and pick-up on Monday. We do make an exception and provide storage space for up to three units per weekend. The Friday event will determine the time of the delivery for these units. If you're a Friday event please arrange to have the units delivered at the START of your rental access time so that TUCO can then hook-up & have the unit running for you...BIG BONUS! If you are a Saturday or Sunday event please just ask them to deliver the unit on Friday between 9:30 am & 11:30 am. All pick-ups should be arranged for Mondays between 10 am & Noon. If your event is on a weekday please ask to have the unit delivered at the START of your rental access time and you'll need to call me to find out the best time for pick-up.

Alternate Options:

You can certainly choose to use the Hay Barn or Manor tent without a heating unit if you prefer. If you do this we advise informing your guests on your invitations that the room is not heated and to dress appropriately. Some groups have even supplied warm drinks & blankets instead of heat – I guess as a peace offering! We do not allow any other heating system including electrical heaters or propane umbrella heaters inside the facilities.

TUCO CONTACT INFORMATION:

TUCO HEAT (425) 743-9533 www.tucoheat.com
UNIT TO ORDER: Barn Item #OHV500 420,000 BTU's per Hour 37 Gallon Tank
Manor Item #TSO80 with thermostat 10 Gallon Tank

**TUCO does not allow groups to share units due to liability reasons.*
